

Suppl. Figure 1, panel A

Dose-response curve of forskolin in the CHO-MC4 and CHO-WT cells measured in the cAMP assay. The forskolin concentrations (0.006 to 200 μM) are shown in a logarithmic scale on the x-axis and the RF% is shown on the y-axis. The black outlined circles represent the data for the CHO-MC4 cells and the black triangles for the CHO-WT cells. The induction time was 3h. All forskolin concentrations were measured in duplicate and values are presented as mean \pm standard error (SEM).
