

a**b**

Supplementary Figure S2. Anti-VEGF mAb (concentration 0.8 mg/mL) increased TUNEL expression in the stratum granulosum (SG). Number of independent experiments $n=4$ (i.e., 1 punch per patient and per treatment group and at least 7 photomicrographs were analysed per condition). Scale bars = 50 μm . Data were analysed with one-way ANOVA, mean \pm SD (Tukey's multiple comparison test). ** $p<0.01$.
