

Supplementary Figure 5

Supplementary Fig 5. Scid, IL-2R γ knockout mice display enhanced susceptibility to *A. fumigatus* challenge. NOD or NOD/*scid-IL2rg*^{-/-} mice were challenged with 5×10^5 conidia of *A. fumigatus*. Survival and body weight loss were monitored daily. Survival plot, *left panel*: Log-Rank test: * $p < 0.05$. Body weight loss (BWL) and area under the curve (AUC, 5dpi), *middle and right plots*. Data is shown as mean \pm s.e.m (shadowed area in BWL plots). Unpaired t-test: * $p < 0.05$. $N = 10$ animals/group.
