

Supplemental Fig 2. Intratracheal Fluticasone and Pirfenidone treatment at (-1 hr) failed to inhibit pulmonary inflammation in rat LPS model (4 hr). Effect of 30 and 100 µg i.t. Fluticasone (Flutica) and 3000 µg i.t. Pirfenidone treatment on (a) Leukocytes, (b) Neutrophils given -1 hr prior to LPS challenge. ***P<0.001 Vs LPS by one-way ANOVA followed by Dunnett's multiple comparison test. N=4/group.
