

Supplementary figure 2

Supplementary Fig. 2. Neuroanatomical distribution of *Crabp1* across the mouse brain. **a** Rostro-caudal analysis of *Crabp1* expression across the mouse brain using *in situ* hybridization with ³⁵S-labeled riboprobes. Brain areas where *Crabp1*+ signal was detected are identified. **b** Representative *in situ* hybridization darkfield images of *Crabp1* across the ARC.
