

**Table E1**

	<b>Diluent</b>	<b>IL-25 (1 pg/ml)</b>
<b>RANTES (500 ng/ml)</b>	17 ± 4	20 ± 7
<b>MCP-1 (500 ng/ml)</b>	7 ± 2	12 ± 1
<b>SDF-1<math>\alpha</math> (100 ng/ml)</b>	15 ± 7	12 ± 1

Pre-incubation (2 hr, 37°C) with IL-25 (1 pg/ml) did not prime mature eosinophil migration to sub-optimal concentrations of SDF-1 $\alpha$  (100 ng/mL), RANTES (500 ng/mL) or MCP-1 (500 ng/mL) (n=3 for each). Values are presented as mean with SEM in parentheses.
