

Bergner S, Halec G, Schmitt M, Aubin F, Alonso A, Auvinen E:

Individual and complementary effects of human papillomavirus oncogenes on epithelial cell proliferation and differentiation
Cells Tissues Organs

Fig. S2. GFP fluorescence in HaCaT cells 32 hours after transfection with wild-type HPV 16, or control HaCaT cells. **A.** Wild-type HPV 16 transfected cells cotransfected with Cre recombinase (+ Cre) or cells without Cre recombinase (- Cre) under fluorescence microscope and transmitted light (TL). **B.** Detection of GFP expression after recombination in cells cotransfected with Cre recombinase (+ Cre) but not in cells without Cre (- Cre) using immunoblotting. Actin was used as a loading control.
