

Supplementary figures

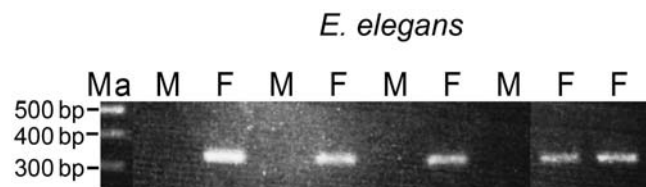

Fig. 1. PCR amplification of kW1 sequence fragments in *Eudromia elegans*. 4 males and 5 females, which were different from the individuals shown in figure 1, were used in this experiment.

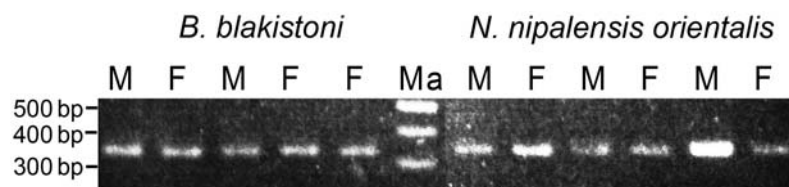

Fig. 2. PCR amplification of kW1 sequence fragments in *Bubo blakistoni* and *Nisaetus nipalensis orientalis*. 2 males and 3 females of *B. blakistoni* and 3 males and 3 females of *N. nipalensis orientalis*, which were different from the individuals shown in figure 1, were used in this experiment.
