SNP, single nucleotide polymorphism; T2D, type 2 diabetes; OR, odds ratio; 95% CI, 95% confidence interval.

p values were calculated by logistic regression analysis with adjustments for age and gender.

Bold indicate that $p < 0.05$ indicates statistical significance.

Supplementary Table 3. Relationships between *CDKAL1* polymorphism and T2D risk according to the stratification by gender and age

SNP, single nucleotide polymorphism; T2D, type 2 diabetes; OR, odds ratio; 95% CI, 95% confidence interval.

p values were calculated by logistic regression analysis with adjustments for age and gender.

Bold indicate that $p < 0.05$ indicates statistical significance.

Supplementary Table 4. Relationships between *CDKALI* polymorphisms and T2D risk according to the stratification by BMI, smoking and drinking

SNP, single nucleotide polymorphism; T2D, type 2 diabetes; OR, odds ratio; 95% CI, 95% confidence interval.

p values were calculated by logistic regression analysis with adjustments for age, gender, BMI, smoking and/or drinking.

Bold indicate that $p < 0.05$ indicates statistical significance.

Supplementary Table 5. Relationships of *CDKALI* polymorphisms with diabetes duration and retinopathy
