

Supplementary Figure 1: This figure was supplied to the raters for assessing MCAGrid. It shows the digital atlas of MCA territory infarction (DA-MCA) in stereotaxic coordinate space. The probability of infarction is displayed in color superimposed on the average T_1 -weighted image in stereotaxic coordinate space. The colour bar refers to the frequency of infarction at each voxel. Stereological grids are overlaid on the DA-MCA to illustrate the grid counting method. For display purpose, only the 2cm grid scale is used.

Supplementary Figure 1
